powder coated items care

wash as required with warm soapy water using a soft clean cloth. for marine or commercial environments, we recommend regular cleaning. do not pressure wash or steam items that are powder coated. if powder coating chips due to a knock and / or rough treatment this is not covered by warranty. touch up paint can be purchased on request (depending on availability). scratches and chips should be repaired as soon as they appear.

house leather care

protect from direct sunlight, heat and weather. dust with a clean dry cloth or use the soft brush attachment on your vacuum cleaner. remove all liquid and food spills immediately. wipe with a clean cloth dampened with proprietary brand leather cleaner suitable for a surface finish leather.

marble and granite

surfaces grazia & co use various marbles, granites, bluestone and tiles. these stones are a natural product so the colour and veins can vary. these hard surfaces can be cleaned with warm soapy water. leaving food residue or liquid on the stone for an extended period can penetrate the stone and cause permanent staining. staining and chipping of the stone is not covered under the warranty and is considered general wear and tear.
