powder coated items

wash as required with warm soapy water using a soft clean cloth. for commercial environments, we recommend regular cleaning. do not pressure wash or steam items that are powder coated. if powder coating chips due to a knock and / or rough treatment this is not covered by warranty. touch up paint can be purchased on request (depending on availability). scratches and chips should be repaired as soon as they appear.

glass

these hard flat surface materials should be cleaned and or dusted with a soft cloth.
